

Level: Bachelor
 Programme: BE
 Course: Object Oriented Software Engineering
 Semester: Fall
 Year : 2017
 Full Marks: 100
 Pass Marks: 45
 Time : 3hrs.

Candidates are required to give their answers in their own words as far as practicable.

The figures in the margin indicate full marks.

Attempt all the questions.

- a) What do you mean by agile development? Explain the agile process and agility? Explain the agile process and agility principles. 8
 - b) How do you estimate the software project? Explain any one of them with example. 7
 - a) What do you mean by RMMM plan? Describe the reactive and proactive risk handling strategies in brief. 7
 - b) What are the project planning processes? Explain the WSHH principle in brief. 8
 - a) What do you mean by the functional and non-functional requirements? Give any four functional and non-functional requirements for computer based online hotel reservation system. Obtain the DFD for library information system. 8
 - b) Define the meaning of software quality and detail the factors which affect the quality not productivity of a software product? 7
 - a) What is UML diagram? Explain briefly about state chart diagram, sequence diagram and collaboration diagram with example. 8
 - b) What are test cases and what is the importance of testing and designing test cases. 8
 - a) What do you mean by SCM? List out the difference between change control and version control in SCM. 7
 - b) Draw the Class diagram and activity diagram for an automated teller machine. 8
 - b) Explain the software process improvement framework in detail. 7
- Write short notes on: (Any two) 2x5
- a) ISO standards
 - b) Cleanroom engineering
 - c) COCOMO model
 - d) Case tools
