Project Topics for BE Students - 1

{ Source : https://www.elprocus.com/computer-science-projects-engineering-students/ }

1. Voice based E-mail for the Blind
2. A Railway Anti-Collision System with Auto-Track Changing and Phis Plate Removal Sensing
3. Computer Folders ‘Security with a Bluetooth-Enabled Mobile Phone and Rinjdal Security Extension
4. Speech Stress Analysis based Cheap Lie Detector for Loyalty Test
5. Credit Card Reader with Face Recognition based on Webcam
6. Recognition of Hand Movement for Paralytic Persons Based on a Neural Network
7. Network Security Implementation Layer through Voice Biometric
8. Agent Based Blocking and Response, Intrusion Detection using Signature
9. Load Balancing of Artificial Intelligence Network using Ant Colony Optimization
10. Authentication and Adaptive Security for DNS System
11. Multicasting of Bandwidth Efficient Video in Multiradio Multicellular Wireless networks
12. ADHOC Networks Based Bandwidth Estimation of IEEE 802.11
13. Data Mining Technique Based Building Intelligent Shopping for Web Services
14. Automatic Teller Machine Network Implementation based Controlling of CAC Connection Admission
15. Adaptive Coaching and Co-Operative System for MANETS
16. Multidimensional and Color Imaging Projections
17. Inter Domain Packet Filters based Controlling of IP Spoofing
18. Hidden Markov Models Based Credit Card Fraud Detection
19. XML Enable SQL Server Based Data Storage and Minimization
20. Artificial Neural Network Based Verification of Digital Signature
21. Design and Implementation of E Secure Transaction
22. Pattern Recognition and Dynamic Character Using Neural Network
23. Verification of Dynamic Signature Using Pattern Signature
24. Data Integrity Maintenance and Dynamic University Linking
25. Filtering and Analyzing of Effective Packet System for ATM Network
26. Efficient and Distribution and Secure Content Processing by Cooperative Intermediaries
27. Rule Mining Algorithm for Efficient Association in Distributed Databases
28. Digest Algorithm for Efficient Message for Data Security
29. By Using Concurrent Engineering Train Simulation Based on Genetic Algorithm
30. Travelling Salesman and Genetic Algorithm Problem Using ATL COM and C#
31. Channel Rate Allocation for Scalable Video Streaming Using Genetic Algorithm over Error-Prone Networks Based on GOP
32. High Speed Face Recognition Based on RBF Neural Networks and Discrete Cosine Transform.
33. Storage Systems Based HBA Distributed Meta Data Management for large Cluster
34. Image Analysis and Compression with PSNR and MSE Technique

Available on notes.arpanadhikari7.com.np

35. Implementation of Threshold Cryptography for MANET Based on Elliptic Curve Cryptography
36. Image Processing for Resizing and Bilinear Filters
37. Architecture of Distributed Database in Next Generation Mobile Networks for Global Roaming
38. Recognition of Dynamic Pattern and Character Using Neural Networks
39. Customer Relationship Management Based on Distributed Component Router
40. Supply Chain Management System Based on Distributed Component Router
41. Dynamic Logistics Management and Support Systems
42. Multithreaded Socket Based Email Server
43. Design and implementation of Mobile Banking
44. JMX Based Managing and Monitoring the Clusters
45. Implementation of Multi Router Traffic Monitoring
46. Real Time Transmission Protocol Based Broadcasting of Multicast Video
47. Multicast Routing For Collaborative Applications with Delay Variation Constrains On Overlay Networks
48. Near-Optimal Multicast Scheme Using a Hybrid Genetic Algorithm for Hoc and Mobile Networks
49. SNMP Based Network Monitoring and Analyzer Tool
50. Network Border Patrol for Promoting Fairness in the Internet and Preventing Congestion Collapse
51. Recognition of Digits Back Propagation and Handwritten Based on Neural Network
52. Novel Framework for Personalized Retrieval and Semantic Annotation of Sports Video
53. Query Workload Based Online Index Recommendations of High Dimensional Data Bases
54. Image Retrieval Imaging Based on Content, Adaptive and Personal
55. Software and Algorithms for problems in Radiation Therapy and Radio Surgery and Medical Applications
56. Bluetooth and J3ME Enabled Full Duplex Automation Based on Mobile
57. Development of an Application for Weekly Automatic College Timetable
58. Using Pythagoras and Trigonometry to Watermark an Image
59. By Using Steganography Compression and Decompression of Wavelet
60. Coded Structured Light Based Real Time 3-D Data Processing
61. A Distributed Learning System with Desktop recording, VoIP, Desktop Sharing and Session Sharing.
62. A Wireless Communication Protocol Based on Electric Bulb
63. Musical Conversion and Recognition for Music Compression
64. Data Warehousing and Data Mining Dictionary
65. Fuzzy Keyword Search in Cloud Computing over Encrypted Data
66. Web Based Online Blood Donation System
67. Web Based Graphical Password Authentication System
68. Identification and Matching of Robust-Face Name Graph for Movie Character
69. Controlling of Topology in Ad hoc Networks by Using Cooperative Communications

Available on notes.arpanadhikari7.com.np

70. An SSL Back End Forwarding Scheme of Clusters Based On Web Servers
71. Motion Extraction Techniques Based Identifying the Level of Perception Power from Video
72. Approximate and Efficient Processing of Query in Peer-to-Peer Networks
73. Web Based Bus Ticket Reservation System
74. Chinese Input with Eye Tracking and Keyboard
75. Automated Image Enhancement Based Identification of Plaque
76. Developing the Encryption, API, Architecture and Security of Biometric Technology
77. Automated Transport Enquiry System in MySQL and C# Based on Voice
78. Modeling and Detection of the Camouflaging Worm
79. Increased Development Process Quality Based Testing of Automotive Real Time
80. SQL Based Employee Management System in ASP and C# .NET
81. Management System of Pharmacy in MySQL and PHP
82. Graph Analysis and Generation for Detecting the Source Code Plagiarism Based on Program
83. Implicit Approach Based Animating and Buildup of Wind Driven Snow
84. Bullet Physics and Cinder Graphics Based Doodle Processing System
85. Simulation and Modeling of Unknown Factors in Acquisition
86. Image Processing Segmentation Based Verification of Secured Fingerprint Using Computational Geometry Algorithms
87. Mathematical Morphology Based Algorithm for Image Noise Reduction
88. Flexible Data Dissemination Strategy in Mobile Wireless Communication Networks for Effective Cache Consistency
89. Fingerprint Verification System Based on a Correction
90. Automatic Removal and Estimation of Noise in From a Single Image
91. Dynamic Time Warping and Triangular matching Based on a Fingerprint Verification System
92. Smart Card Security and Static Analysis Perspective from a Java
93. Internet Based Monitoring of Remote Electrocardiogram
94. Internet Protocol Trace Back Based Detection and Modeling of Camouflaging Worm
95. Ridges and Fusion of Minutiae Based Fingerprint Identification Using Strength Factors

Available on notes.arpanadhikari7.com.np
